ACCESS PLAN
Per §11.1607(j) (7), the following is a description of the processes and procedures followed by Baylor Scott & White Care Plan (BSWCP) to assure that services are made available and accessible to enrollees for all specialties and in all geographic areas which are identified in the remainder of the access plan.; it is entered in this section to avoid repetition
Baylor Scott & White Care Plan (BSWCP) has active policies and procedures in place that enable members to utilize authorized services as in-network, in all counties and for all specialties/services, where the network lacks a sufficient number of providers to meet the needs of enrollees. Baylor Scott & White Care Plan (BSWCP) then negotiates a Letter of Agreement with the out-of-network provider to ensure the member receives in-network benefit coverage. Covered member is not balance billed and/or penalized by Baylor Scott & White Care Plan (BSWCP) for any specialty/service that is identified in an area that does not have a
The information below describes the counties and specialties where Baylor Scott & White Care Plan (BSWCP) does not have an adequate provider network per the requirements set forth in TAC §11.1607. A plan to enable enrollees to obtain in-network benefits is provided in each section. Baylor Scott & White Care Plan (BSWCP) has active policies and procedures in place that enable members to utilize authorized services as in-network in all counties and for all specialties and services where the network is inadequate. Baylor Scott & White Care Plan (BSWCP) negotiates a Letter of Agreement with the out-of-network provider to ensure the member receives in-network benefit coverage. Covered member is not balance billed and/or penalized by Baylor Scott
In the event a Member is unable to get specialized services within the contracted network; our contracting team will immediately research and identify a Provider to administer the service. Once a Provider is identified, we will execute a Single Case Agreement
Baylor Scott & White Care Plan (BSWCP) leadership continually evaluates the adequacy of the provider network through various means such as the Network Issues Committee that meets once per month, monitoring concerns and access issues from Members and other providers, and business expansion strategies. Baylor Scott & White Care Plan (BSWCP) negotiates single-case agreements and letters of agreement to assist with gaps in coverage in areas where there is a lack of providers, especially in rural areas. Baylor Scott & White Care Plan (BSWCP) includes the following hold-harmless language in its single case
"Provider hereby agrees that in no event, including, but not limited to non-payment by Baylor Scott & White Care Plan (BSWCP) , insolvency, or breach of this Agreement, shall Provider charge, collect a deposit from, seek compensation, remuneration or reimbursement from, or have any recourse against Member or any person or persons acting on her behalf for Services provided
Additional Information

1.The provider list (provider directory and/or online directory) includes individual provider(s) listed many times at several different addresses; for availability and accessibility of care within the service area, an individual provider that the provider listed numerous times, can adequately serve the enrollee population when they have multiple practice addresses because many of Baylor Scott & White Care Plan (BSWCP) contracted group's employee physicians that rotate between practice facilities. For example, Provider A works at location 1 Monday thru Wednesday and then Provider 2 works at location 1 Thursday thru Sunday. For hospital based provider groups, Baylor Scott & White Care Plan (BSWCP) is contracted with groups that consist of 30 or more providers that
2. There are repeated providers on our provider list that are practicing within a group/company that has multiple locations (i.e. large clusters of providers listed at the same addresses). The contracts for these sites are at the group level but some are individually contracted providers. Contracting duties are not delegated. There are times that Baylor Scott & White Care Plan (BSWCP) delegates credentialing if the group has at least 100 providers and the group does the credentialing of their own providers. A pre-delegation assessment is completed to ensure the group follows the same regulatory standards as Baylor Scott
4a. An estimate of total claims cost savings per year the insurer anticipates will result from using a local market access plan instead of contracting with providers located within the service area, and its impact on premium; Baylor Scott & White Care Plan (BSWCP) does not use a local access plan in lieu of contracting with providers within the service area. The access plan is used in situations where there are no providers available to contract, a provider is in the process of being credentialed, or when services are to be provided by a contracted facility. Given that the access plan is not used in place of contracting there are no savings to the health plan and therefore, no impact on premium.
